

1 Events passing $e4\nu$ selection1.1 Results for ${}^4\text{He}$ at 2.261 GeV

Figure 1: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 2: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 3: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 4: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

3 1.2 Results for ${}^4\text{He}$ at 4.461 GeV

Figure 5: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 6: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 7: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 8: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

4 1.3 Results for ^{12}C at 1.161 GeV

Figure 9: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 10: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_{\text{T}} < 0.3$ GeV/c (bottom left) and $P_{\text{T}} > 0.3$ GeV/c (bottom right).

Figure 11: Comparison between P_{Miss} , k_{Miss} and $P_{\text{n.proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 12: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

5 1.4 Results for ^{12}C at 2.261 GeV

Figure 13: Comparison between P_{Miss} , k_{Miss} and $P_{\text{n,proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 14: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_{\text{T}} < 0.3$ GeV/c (bottom left) and $P_{\text{T}} > 0.3$ GeV/c (bottom right).

Figure 15: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 16: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

• 1.5 Results for ^{12}C at 4.461 GeV

Figure 17: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3 \text{ GeV/c}$ (bottom left) and $P_T > 0.3 \text{ GeV/c}$ (bottom right).

Figure 18: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_{\text{T}} < 0.3$ GeV/c (bottom left) and $P_{\text{T}} > 0.3$ GeV/c (bottom right).

Figure 19: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 20: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

1.6 Results for ^{56}Fe at 2.261 GeV

Figure 21: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3 \text{ GeV/c}$ (bottom left) and $P_T > 0.3 \text{ GeV/c}$ (bottom right).

Figure 22: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_{\text{T}} < 0.3$ GeV/c (bottom left) and $P_{\text{T}} > 0.3$ GeV/c (bottom right).

Figure 23: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 24: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

8 1.7 Results for ^{56}Fe at 4.461 GeV

Figure 25: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 26: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_{\text{T}} < 0.3$ GeV/c (bottom left) and $P_{\text{T}} > 0.3$ GeV/c (bottom right).

Figure 27: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 28: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

2 Events passing $e4\nu$ selection with $|x_B - 1| < 0.2$

2.1 Results for ${}^4\text{He}$ at 2.261 GeV

Figure 29: Comparison between P_{Miss} , k_{Miss} and $P_{\text{n.proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 30: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 31: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 32: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

2.2 Results for ${}^4\text{He}$ at 4.461 GeV

Figure 33: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 34: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 35: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 36: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

12 2.3 Results for ^{12}C at 1.161 GeV

Figure 37: Comparison between P_{Miss} , k_{Miss} and $P_{\text{n,proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 38: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 39: Comparison between P_{Miss} , k_{Miss} and $P_{\text{n.proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 40: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

13 2.4 Results for ^{12}C at 2.261 GeV

Figure 41: Comparison between P_{Miss} , k_{Miss} and $P_{\text{n,proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 42: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 43: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 44: Comparison between P_{Miss} , k_{Miss} and $P_{\text{n.proxy}}$ in P_{Miss} slices in the high momentum tail.

14 2.5 Results for ^{12}C at 4.461 GeV

Figure 45: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 46: Correlation between P_{Miss} and k_{Miss} for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).

Figure 47: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the mean filed region.

Figure 48: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ in P_{Miss} slices in the high momentum tail.

15 **2.6 Results for ^{56}Fe at 2.261 GeV**

Figure 49: Comparison between P_{Miss} , k_{Miss} and $P_{n,\text{proxy}}$ for all events (top), for events with $P_T < 0.3$ GeV/c (bottom left) and $P_T > 0.3$ GeV/c (bottom right).
